

Hi,

I am Nidhisha, currently working as a Technical writer at BrowserStack, also, I have experience working as a Software Engineer at TryCatch institute where I worked on Python, Django framework, and ML. I have been developing websites and web applications using Python, Django framework, Numpy, pandas, Matplotlib, CSS, and Twitter Bootstrap for around 1.5 years now. My experience lies in web app development. All my projects can be found on my GitHub repositories (<https://github.com/nidhisha-shetty>). I'm a self-taught Python and Django developer and have spent almost the last one and half years working on side projects and strengthening my coding skills, and would now like to pivot in the same domain in the industry and apply my skills to real-life business use-cases.

PFA my updated resume for your reference. Please do let me know if you need any further details.

Looking forward to connecting with you!

Sincerely,
Nidhisha Shetty
